Customer Reviews

The Future Textbook Series are appropriate for English learners who would like to focus on everyday English, rather than academic English. It uses a communicative approach of learning as opposed to a grammar-based one. There is some grammar included, but the book uses integrated skills to help students handle common situations they may encounter. The activities are kept brief

and varied, so it's not boring. I recommend this textbook for classroom instruction or self-study.

Only a homework book, very angry
